### The News at Nuge

---

#### WE'RE MOVING TO NUGELAND!!

Yes you read that right! We have finally chosen our new location to land Go-4 Nuge. David and Bobbi have purchased a 1.17 acre site with 8200 sq ft of building structures this includes a 5000 sq ft warehouse, 1600 sq ft of office space including 6 available offices and a 1600 sq ft smaller warehouse where Go-4 Nuge will reside.

While we are not quite ready to begin operations out of this new facility, here are some things our customers should expect:

- We will fully be moved out of our current locations both in Ballard and at our home compound by JUNE 1st.
- All of our supplies will be in one location! Trucks, walkies, motorhomes, production supplies... EVERYTHING will be in one place... We know you've been waiting for this for a while.
- Bobbi and Dave will no longer be living at Go-4 Nuge. The yard will still be considered a secured lot, but there will not be a person onsite 24/7 anymore.
- We will no longer need to be notified about movement in the yard before 6am or later than 10pm.
- We will still be offering 24/7 pick up and drop off of all the production supplies that are currently stored in the shipping containers or Nuge Cubes as we are taking those with us.
- All walkie orders or any orders that came from the Nuge Home Compound must be arranged between office hours: Monday through Friday 9am-5pm. We will still allow pickups after hours and on weekends, but without someone on site 24/7 we will not be able to accommodate last minute walkie orders during off hours.
- While we are leaving the northwest sector we have been in talks with NW Camera Company and their new shooting stage coming soon in Fremont as a satellite station.

---

**Currently we are in negotiations with a few powerful industry partners to rent the big 5000 sq ft warehouse! While we have not come to a conclusion who will move in we are excited about the possibilities**

## Coming Soon...THE POWER PA COURSE

I have been lucky enough to teach many well attended Production Assistant Classes since we began offering them five years ago. It's been a huge success and I am honored to carry this torch for the film industry.

Over the last year some of you have heard me talking about taking the PA Class to an online format... So I have teamed up with Goodstudio and together we're producing a comprehensive video course that will be able to reach a broader body of students around the country and maybe jumping into Canada.

As most people know, a production assistant is an entry level position to the wonderful world of creating with still and moving imagery in order to tell a story. That story could be narrative, documentary, corporate video or in house information, commercial, or catalog. With each class, what has stood out to me the most is the conversation is not just about how to be a good PA... it's also a discussion about the passion for the film industry. One of my main focuses has been to make a safe space to discuss one's passion as its directly connected to the participants motivation for coming to the class.

One of our goals is to expose our students to the film industry through hands on work as a crew person. We intend to market this to high school and college students as well as others who may want to explore a career change. Our focus is not on film making, but on getting started in the film business as a crew member. We will cover what that means, what it takes, how to get there and how to move into other crew positions.

**If you or someone you know is interested in the online course PLEASE REGISTER!**

**\*This is not to register for the zoom class mentioned above\***

While we are still in the process of filming our online courses, reserving your spot is immensely helpful for us to get an insight to the demand for this service.

**Don't Forget!**

**We Carry COVID Safety Inventory Items**

*We are always on the look out for items that will help our customers increase their safety on set.*

### AIR SCRUBBERS

AIR SCRUBBERS use heavy duty Hepa filters to remove 99.97% of harmful particles from the air. They are ideal for use on set, in a production office or in a motorhome.

### Hand Washing Dual Sink

Portable hand washing stations are becoming a popular (and often required) option for locations where indoor sinks are not available. The 22.5 gallon tanks lasts an estimated 1,400 pumps of water.

#### Automatic Hand Sanitizer Dispenser

These very lightweight units are a necessity on set and their touch-free dispenser promotes safety and hygiene on set. These units come pre-filled with sanitizer and refill bottles for multi day shoots are available for purchase.

Visit our website for a full list of our [Safety Inventory Items](#) and our [COVID Related Expendables](#).

Please don't hesitate to email us with any and all questions you may have

#### Whats The Nuge Word?

The way in which I have succeeded in life is by staying the course and following through. Pursuing what I have felt is true with what it is I am supposed to be doing for myself and the community.

Sometimes that has been a challenging course to figure out which is the right direction to take. One choice you make between 2 very different paths could change your life in very different ways. I have found it always helpful to be in touch with what I really want at the moment and how that relates to my over all passion in life.

I do know I am here to assist the community though sometimes I have gotten lost in my daily tasks and frustrations of just running a business, repairing motorhomes, cleaning chairs and tables, washing a truck and the like.

At the end of the day I look back and know my actions were important to get me to the next day or the moment for that matter.

Ultimately the time is always NOW.
